**SCA TISSUE UNVEILS NEW TORK MATIC II**

Hands-free towel system loads and dispenses better than the competition

SCA Tissue has introduced the Tork Matic II, a totally touch-free towel dispensing system that is ideal for commercial washrooms, wash stations and food preparation areas.

The versatile Tork Matic II consistently delivers one towel at a time, without having to touch anything but your own towel. This virtually eliminates the risk of cross-contamination and wasted towels. The user-friendly system is designed to serve patrons quickly and safely by automatically dispensing a new towel after the previous one is used.

Besides improving hygiene and speeding washroom traffic, the Tork Matic II helps control costs. First, patrons tend to use less paper when using Tork Matic II compared to more traditional roll towel dispensing alternatives. Second, the dependable towel dispensing system is an easy-to-load roll towel unit with automatic paper feeding mechanism. The Tork Matic II's stub roll feature ensures complete roll usage. As an added cost-saving benefit, the same towel rolls can be used in both the Tork Matic II and the electronic "no touch" Tork Intuition dispensing systems. This allows for the installation of the right dispenser for the right application, without the hassle of managing more than one refill.
