## SCA's Wave of Innovation Will Be Featured At ISSA

### SCA Tissue's Touch-Free Roll Towel System Improves Hygiene, Cuts Costs

NEENAH, Wis., August 12, 2005—SCA Tissue, a Gold Level sponsor of this year's ISSA InterClean Show, will feature its popular Tork® Intuition™ II touch-free electronic roll towel system at booth #2158.

The Tork Intuition II dramatically improves hygiene and virtually eliminates cross contamination. By utilizing a patented microchip sensor that automatically detects the presence of a hand, the Intuition II ensures that patrons touch only the towel they will use. The distinctive sleek design keeps towels completely enclosed until needed, conforming to HACCP guidelines.

The dispenser also features an adjustable towel length of 8 inches to 47 inches, an adjustable time delay of from one to five seconds and a stub roll compartment that enables complete use of the paper rolls. The result is more precise control of consumption and substantial reductions in supply waste and labor for refills.

“The Tork Intuition II can be installed in a wide range of options, including mounting directly to a wall, installing within a recessed wall opening, or retrofitting into a stainless steel recessed towel cabinet,” said Dan Hietpas, SCA Tissue Proprietary Systems Product Manager. “This versatility makes it ideal for use in office buildings, healthcare facilities and foodservice environments.”

A new addition to Tork Intuition II is a filler panel, which allows the dispenser to mount directly into existing recessed dispenser areas. The heavy gauge stainless steel is custom made to accommodate the Intuition II. When installed, it leaves no unsightly gaps or sharp edges, maintaining an upscale image. The filler panel is designed to retrofit existing recessed dispenser cabinets for ADA

compliance without having to remove the entire stainless steel unit. The new Tork Intuition II filler panel will be a key point of interest at this year's ISSA.

The Tork Intuition II is compatible with a full range of towels from natural to our newly launched Tork Plus cloth-like towel, which incorporates increased softness, bulk and absorbency," Hietpas said.

Both the Tork Intuition II and the Tork Matic II use the same towels. That means a mix of mechanical and electronic touch-free dispensers requires stocking only one paper SKU, saving storage space.

In addition to Tork Intuition II, Tork Matic II and Tork Plus towels, SCA Tissue's exhibit at ISSA will feature its ~~new~~ Tork Xpress Portable towel dispenser, which provides convenient countertop towel dispensing in a sleek, versatile, stylish dispenser. The Xpress Portable uses Tork's unique folded towel system that ensures the presentation of only one towel at a time, minimizing the risk of cross contamination and reducing waste and refilling expenses.

SCA Tissue North America is a major supplier of Away-From-Home tissue products, with brand names including Tork®, Park Avenue Ultra®, Coronet®, and MainStreet®. The parent company, SCA, is a \$13 billion international paper company that employs some 53,000 people in 50 countries. In the Americas, SCA is a leader in tissue, specialty packaging and personal care. More information is available at [www.scatissue.com](http://www.scatissue.com).
